

The FCC should not implement any proposal that lessens Indiana's Telephone Privacy law protections. I was having to pay the phone company to block the unwanted calls we were receiving. I would receive from 4-10 calls A DAY! Indiana's law allowed me to discontinue paying to block these calls. Since it went into effect I have not received ANY calls. No more interruptions during dinner or during the day when someone would be home ill. Our law is wonderful and we don't want it changed! Thank you for your attention to this.
